10:00-12:00 - SAST

One and half hour lecture plus Q&A

R750 per delegate

Full payment must be received three days before the webinar. Registrations close three days before the webinar starts.

Are you unsure about how to apply the principles of “sustainable investing”?

Traditional investing provides short-term value to investors by delivering an expected return on capital. The concept of sustainable investing is to provide balance to this investment process by using environmental, social and governance (ESG) criteria to improve long-term outcomes. With reference to international developments, this webinar will provide some insight into all the relevant legislation, policy documents and publications in South Africa to equip participants to be proactive in their approach to applying sustainable investing principles in their organisation.

Presented by:

Kerry Kopke
Director of Attune Solutions
