

ENHANCE JUDICIAL SKILLS WITH JIFA'S COMPREHENSIVE ONLINE COURSES

JIFA's three meticulously crafted, dynamic, online courses have been specifically designed to meet the training needs of all African judiciaries. These courses have been tailored to empower Chief Justices, heads of training institutes and other judicial leaders. JIFA's courses are the ideal choice to enhance the skills of your judiciary.

1. LEGAL RESEARCHERS COURSE (4 days online)

In this course, participants will be introduced to the role of the judicial researcher and what judges expect from their researchers. They will also explore the core competencies that legal researchers are expected to exhibit, including an understanding of legal ethics and basic drafting skills for several common formats (such as judgments, memos and speeches).

2. JUDGMENT WRITING COURSE (4 days online)

In this course, participants will hone their judgment writing skills. They will explore different judgment types, audiences and styles; identify their own written 'voice'; and learn new techniques that they can apply when writing their own judgments.

3. CORE SKILLS COURSE (5 days online)

The core skills course aims to equip judicial officers with relevant knowledge and practical skills to manage courtrooms and cases efficiently and effectively. Participants will explore the role of a judicial officer in a constitutional democracy and engage with their role within the separation of powers. They will also consider the ethics, independence and impartiality required of their role. Participants will also learn skills for crafting and delivering judgments.

It is a cost-effective way of training between 10 - 30 people at a time.

KEY BENEFITS

- Cost-effective training for 10 to 30 participants at a time.
