Evolving your existing integrated report to better showcase your company's commitment to sustainability and ESG (environmental, social and governance) practices is a strategic initiative that can enhance transparency, stakeholder trust, and long-term value.

To achieve this goal, the course will cover these essential steps:

- Reviewing and Aligning with Frameworks
- Highlighting ESG Integration in Strategy
- Enhancing Transparency and Clarity
- Showcasing Case Studies and Impact
- Incorporating Future Goals and Progress
- Engaging Internal Experts
- Communicating with Credibility

This evolution is essential in a business environment increasingly focused on sustainable practices and responsible governance.

Aimed at: board members, integrated reporting teams in companies, contributors to integrated reports in an organisation, investor relations, strategy staff, and company secretaries.
