This 6-hour online course will provide an overview of the various aspects to consider during a merger, with a particular focus on aspects of competition law, labour law and intellectual property law.

Mergers and acquisitions between business entities entail a number of key legal, business, human resources, intellectual property, and financial issues. To successfully navigate the sale, acquisition or merger of a company, and to advise clients, all legal professionals, whether they are in practice or corporate counsel, must understand the dynamics and issues that frequently arise in the legal landscape when dealing with M&As.

The course would benefit in-house counsel, corporate lawyers, compliance officers, business owners, executives, directors, change managers, and board committee members.
