SAST

COURSE DURATION

15 hours
over 5 days

COURSE FEE

R7,200 per delegate
Includes any course materials. Full payment
must be received 3 days before course starts.

Environmental Collaboration & Conflict Resolution (ECCR) is a growing field that seeks to resolve environmental conflicts by enabling a customised approach that optimises mutually beneficial and enduring solutions.

ECCR offers an expansive range of conflict management options, techniques, and processes to prevent disagreements from devolving into community tension, violence, and protracted litigation. As such, developing ECCR skills has become a critical risk management tool for the private and public sectors.

The course covers the elements and steps of an effective ECCR process, pre-conflict diversionary tactics, and how and when to deploy these. Participants will explore ECCR principles, standards, guidelines and methodologies, including joint fact finding (JFF), negotiation, facilitation, conciliation and mediation, and convening/conflict assessment.

Aimed at public and private sector middle to senior management who engage with diverse stakeholders regarding any aspect of environmental management.

PRESENTED BY: Jennifer Kamerman - an environmental lawyer who holds a B.A. LLB. LLM (Environmental Law) from UCT. Environmental law advisor and public interest mediator.
